

Workshop 8

Machine Translation

Task

Work in team of two.

1. Pick one language that is not English.
2. Identify challenges in Machine Translation from English to the language chosen (or from the chosen language to English).
3. Explore and discuss existing techniques used for MT task (particularly for the language you choose).
4. Describe how MT models are normally evaluated. Do you think automated evaluation is credible?

Submission

1. Prepare the slides that summarize your findings.
 - Cite all sources and references.
2. Upload your slides by noon.
3. Present your findings next week.
